

# Thanks for Purchasing Your Banner at Imaging Specialists!

Here are some tips on making your vinyl banner last:

## ***1. Secure it***

When hanging your banner, secure it well. Otherwise, the wind can catch it and whip the corners. Our banners have grommets every two feet for easy hanging.

## ***2. Roll it***

Loosely roll your vinyl banner with the vinyl facing outward. Don't fold it or put anything very tight, like a rubber band, around it which could permanently crease or warp it.

## ***3. Clean it***

Do not use solvents to clean your banner. Wipe it down with a damp, soft cloth. If needed, use a mild detergent or soap and water. Wipe clean with soft cloth. Do not use harsh solvents. Make sure your banner is completely dry before storing it.

## ***4. Store it***

Store the banner in a cool, dry place. Don't store your banner in extremely high temperatures, such as a car trunk, attic or storage building.

If you have any problems with your banner, or any questions concerning care, contact ISI at [info@imagingspecialists.net](mailto:info@imagingspecialists.net) or 336-372-3002.
